

Beginning steps for CNA procedures:

- Identify yourself by name to the resident by his/her name
- Wash hands
- Explain procedure to resident
- Provide privacy
- Adjust bed to safe level and lock wheels of bed

Ending steps for CNA procedures:

- Return bed to lowest position and remove privacy measures
- Place call light within resident's reach
- Wash hands
- Report any changes in resident to nurse
- Document the procedure

Steps to hand-washing:

- Turn on water
- Wet hands and wrists
- Apply soap
- Keep hands lower than elbows with fingertips down, lather for minimum 20 seconds
- Clean nails by rubbing in palm of other hands
- Rinse all surfaces of hands (do not touch sink)
- Use clean/dry paper towel to dry surfaces, dispose of paper towel (do not touch the trash container)

Don (to put on) PPE:

1st: Gown

3rd: Goggles

4th: Gloves

Doff (to take off)

1st: Gloves

2nd: Gown

3rd: Goggles

4th: Mask

*wash hands before and after

Chapter 1 Review:

- Types of facilities (acute care vs long-term care vs hospice care)
- Length of stay
- Chronic conditions vs acute conditions
- 8 types of healthcare settings (and definitions of each)
- ADLs
- Adaptive devices
- Culture change
- Person-Centered Care
- Medicare vs Medicaid (who qualifies for these and defining the 4 parts of Medicaid)
- Care team and roles of care team members (Who can diagnose and prescribe treatment and who can assign jobs to CNAs)
- Chain of Command
- Typical tasks the CNA will perform
- Scope of Practice
- Purpose of a care plan
- Difference between policy and procedure
- Professionalism
- OBRA (purpose of OBRA, federal regulations for CNAs, and CEU requirements)
- Resident rights
- Types of abuse (and examples of each)
- The role of an Ombudsman
- HIPAA
- PHI
- When to document and how to correct errors in documentation
- Converting clock time to military time
- MDS
- Incident reporting
